**Subject:** Note for Diana

Hi Diana –

The attached information is submitted in response to the request from the panel regarding Appendix G of the Draft Toxicological Review of Benzo[a]pyrene.

Appendix G contains all major public comments received on the draft IRIS Toxicological Review of Benzo[a]pyrene (dated August 2013), along with EPA's responses.

The comments were synthesized and paraphrased, and were organized to follow the order of the Toxicological Review.

Tab #1 of the attached spreadsheet lists each specific comment referred to in Appendix G, along with the submitters of those comments. The hyperlinks in this sheet are active, and will take panel members directly to the specific comment at [regulations.gov](http://www.regulations.gov).

Please note that the comments attributed to Arcadis in Appendix G are labelled in the docket as being submitted by Russell White, Health Sciences Manager at the American Petroleum Institute on behalf of a number of entities.

While Appendix G only summarizes the major public comments received by EPA, all public comments received were taken into consideration in revising the draft assessment prior to posting it for external peer review.

Tab #2 contains a complete list of all comments received during the open comment period. The hyperlinks in this sheet are also active, and will take panel members directly to the specific comment at [regulations.gov](http://www.regulations.gov).

The entire public docket for this assessment is also available at <http://www.regulations.gov> (Docket ID No. EPA-HQ-ORD-2011-0391).

Please let me now if you need anything else.

Thanks!

-----
